

After some confusion between these calipers, we hope the following guide lines will help . . .

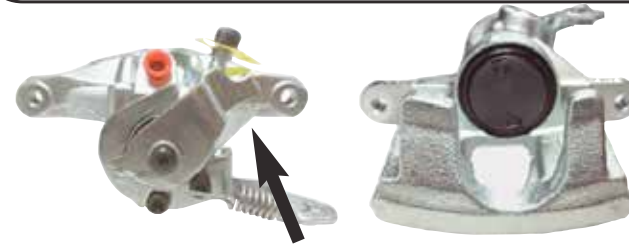

Ford Mondeo 10/00 > 08/04

CA2076 & CA2076R

When looking at the rear of the caliper, the operating lever for the handbrake is to the left.

CA2242 & CA2242R

When looking at the rear of the caliper, the operating lever for the handbrake is to the right. Unfortunately cast numbers are not helpful in this situation, as both units have the same numbers. (YO1134/YO1135). The only difference in these calipers is the mounting for the handbrake levers both for inner & outer cables.
